DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 11 is rejected under 35 U.S.C. 102(b) as being anticipated by Ponticelli [US 4,742,978].

Regarding claim 11, Ponticelli discloses an audio rack (15) for vehicle into which a plurality of electrical modules are insertable comprising:

- a first storage location (figure 1) for accepting a first electrical equipment having a first width size; and
- a second storage location (figure 1) having a second width size that is smaller than the first width, wherein one of the first and second storages space disposed on top of the other (figure 1); and
- each of the first width and the second width being uniform along the depth of the respective storage space (figure 1).

Allowable Subject Matter

3. Claims 2-4, 6-9, 12-20 and 22-23 are allowed.
4. Claim 21 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
5. The following is an examiner's statement of reasons for allowance: The prior art of record fails to disclose an audio rack for vehicle having first and second storage locations wherein the first storage location has the width size greater than the second storage location and a connection unit disposed in the space as a size of the storage location not occupied by the first and second storage locations which make connection between electrical equipment in the first storage location and the controller, and an electrical connection between the second storage location and the controller wherein the controller controls the first and second electrical equipment via the connection unit.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

6. Applicant's arguments with respect to claim 11 have been considered but are moot in view of the new ground(s) of rejection.
